Traditional communication methods like email, newsletters, or intranet systems often struggle to be effective because they cause information overload and rely on pull-based communication. The Desktop Ticker overcomes these challenges by using push communication, delivering critical information in real-time directly to employees' screens without significant disruption.

Increase visibility

Display messages on top of all applications to boost their visibility and make them hard to miss.

Optimize reach

Deliver time-scheduled, targeted messages to all desk-bound employees, regardless of their location.

Drive action

Capture attention through motion and drive action with clear call-to-action buttons.

Try it yourself

Take a quick guided tour and experience how it works. It only takes a few minutes.
